PERSONAL PROJECTS

TnM Website (01/2020 – 02/2020)

- A team of students of my colleges made the website for our College's official Tech and Cultural Fest Techsurge and Mridang. I was given the responsibility of handling the back end of the website which mainly involved an Automatic notification system to inform participants about the events they registered for and registration of Users which was achieved using google service of Google Sheets.

Disease Reporting System (12/2019 – 01/2020)

- A Django based dynamic Website implementing the SMTP protocol to inform the registered users about any disease outbreak and its cure, remedy or any other News flash. The website was further completely dynamic allowing admins to easily manage the portal.

Tourism Webservices (06/2019 – 07/2019)

- My team and I developed various web services for tourists involving fetching data from the database processing it and displaying the best deals and plans for the client to ease their experience as a tourist to a completely new location .
